

Greener Home Loans Program

Why offer a “Greener Home Loans” program?

There are rebates available to New Brunswickers, such as those offered through NB Power (<https://www.nbpower.com/en/smart-habits/energy-efficiency-programs/>), which allow them to save energy, save money, and help the environment. Once the homeowner gets a plan on how they will save energy (Heat pump, solar, insulation, etc.), they then wonder how to finance it.

What is the “Greener Home Loans” program?

Progressive Credit Union is currently offering preferred rates on loans (as low as Prime + 1%*) to individuals who are upgrading their homes to more efficient technology. (And we’re inviting other Credit Unions to participate). Energy upgrades such as:

- **Insulation improvements**
- **Window improvements**
- **More efficient heating and cooling systems**
- **Heat pumps / Geothermal systems**
- **Solar technology**
- **High efficiency appliances**
- **... and other home efficiency upgrades.**

* Residential properties only. Individuals must qualify for financing/OAC. Rate subject to change or withdrawal without notice. Properties and applicants must be in New Brunswick.
